

TABLE OF CONTENTS

1. INTRODUCTION TO AUTOCAD

Introduction to AutoCAD

Ribbon, workspace, help and command search

Open, save and restore drawing

Specifying drawing units

Making and saving drawing template

Pan and Zoom

Undo and Redo Actions

Making selection sets

Creating and saving drawing views

2. CREATING DRAWING

Lines

Circle

Arcs

Introduction to polyline and spline

Rectangle

Polygons

3. MAKING DRAWINGS ACCURATELY

Understanding co-ordinate system

Using grid and snap

Polar and Ortho mode

Dynamic input

Object snap

Object snap tracking

TABLE OF CONTENTS

4. MODIFY TOOLS

Move and copy command

Rotate and Scale

Offset and Mirror

Trim and Extend

Erase, Explode and Join

Stretch

Fillet and Chamfer

5. DRAWING TOOLS

Rectangular array

Polar array

Path array

Creating hatch

Associative and non-associative hatch

Creating gradients

Inquiry commands

6. TEXT, DIMENSIONS, AND OTHER ANNOTATIONS

Creating dimensions

DIM command

Modifying dimensions

Modifying basic dimension style

Creating multileader

Creating text style

Creating single line and multiline text

Creating table

TABLE OF CONTENTS

7. MANAGING DRAWING

Creating layer and assigning objects

Using layer property manager

Using layer panel

Hiding and isolating objects

Editing object properties

8. WORKING WITH BLOCKS

Understanding Blocks

Creating and inserting blocks

Write block and global blocks

Using design centre

Using content explorer (bimobject.com)

9. GETTING OUTPUT FROM DRAWING

Preparing layout and page setup

Adding Title block to layout

Adding viewports and setting scale

Plotting drawing

10. PROJECTS

Making top view of mechanical component

Making a sectional view of a part

Making a circuit diagram

Making a sample floor plan
